What Is Xanax and How It Works

Xanax, known by its **generic name Alprazolam**, belongs to the **benzodiazepine** class of medications. It helps calm the brain by enhancing the effects of a natural chemical called GABA, reducing excessive nervous activity. This makes it highly effective in treating **generalized anxiety disorder (GAD)** and **panic disorders**.

When you **buy Xanax online** through our verified store, you can choose the dosage that best suits your treatment plan, including **Xanax 0.25mg, 0.5mg, 1mg, and 2mg** options — all sourced from **FDA-approved manufacturers**.
