### **What is Claritin?**

Claritin is a second-generation antihistamine that works by blocking histamine, a natural substance in the body that causes allergy symptoms. Unlike first-generation antihistamines, Claritin is non-drowsy, making it suitable for daytime use without affecting alertness or focus.

### **Common Uses Include:**

- **Seasonal Allergies:** Reduces sneezing, runny nose, and itchy eyes.
- **Chronic Allergic Rhinitis:** Manages persistent allergy symptoms year-round.
- **Skin Allergies:** Helps with hives, itching, and mild rashes caused by histamine reactions.
